Bulletin of MECHANICAL ENGINEERING EDUCATION

VOLUME 4

1965

EDITORS: **J. H. LAMBLE, J. PARKER and J. L. DUNCAN**

in collaboration with

Prof. W. JOHNSON

The University of Manchester Institute of Science & Technology

Supported by an International Board of Consulting Editors

Bulletin of MECHANICAL ENGINEERING EDUCATION

Joint Editors

J. H. LAMBLE, D.Sc. and J. PARKER, Ph.D.

Reviews Editor

J. L. DUNCAN, B.E. (Melbourne)

in collaboration with Professor W. JOHNSON,

The University of Manchester Institute of Science & Technology.

Consulting Editors

A. N. BLACK, The University, Southampton.

B. A. BOLEY, Columbia University, New York.

A. F. BURSTALL, Durham University, Newcastle upon Tyne.

W. CARNEGIE, Battersea College, London.

A. W. J. CHISHOLM, Royal College, Salford, Lancs.

J. A. COLE, University of Western Australia, Australia.

B. CROSSLAND, Queen's University, Belfast, N.I.

J. P. DUNCAN, The University, Stanley Park, Vancouver, B.C. Canada.

W. N. FINDLEY, Brown University, Providence, R.I.

H. HAMPSON, Rob't. Gordon Technical College, Aberdeen.

D. W. HOLDER, Oxford University, Oxford.

J. H. HORLOCK, Liverpool University, Liverpool.

J. G. JAGGER, Bradford Institute, Bradford, Yorks.

K. L. JOHNSON, Cambridge University, Cambridge.

G. D. S. MACLELLAN, Glasgow University, Glasgow.

J. B. MANTLE, University of Saskatchewan, Saskatoon, Canada.

J. MARIN, U.S. Naval Postgraduate School, Monterey, Calif.

D. L. MORDELL, McGill University, Montreal, Canada.

E. W. PARKES, Cambridge University, Cambridge

E. PESTEL, Technische Hochschule, Hanover, Germany

G. F. C. ROGERS, Bristol University, Bristol.

M. C. SHAW, Carnegie Institute, Pittsburgh, Pa.

J. B. THIRLWELL, Northampton College, London.

A. L. TITCHENER, University of Auckland, New Zealand.

S. A. TOBIAS, Birmingham University, Birmingham.

A. C. WALSHAW, the College of Advanced Technology, Birmingham.

A. H. WILLIS, University of New South Wales, Australia.

Publishing Offices

Pergamon Press Limited, Headington Hill Hall, Oxford, England.

Pergamon Press Inc., 44-01 21st Street, Long Island City, N.Y. 11101.

Annual Subscription Rates

(A) For all institutional, industrial and government establishments, and educational establishments outside the British Commonwealth, £7 ($20).

(B) For individuals and for educational establishments within the British Commonwealth, £2 ($6).

Published Quarterly.

VOLUME 4

CONTENTS LISTS

Number 1

PAGE

Editorial 1

K. R. KNOWLES: The teaching of applied mechanics 3

C. R. WEBB: The teaching of mechanics of machines 11

B. J. FIELDING: Laboratory work relative to the theory of machines course 15

G. C. SPENCER: On the teaching of the use of strain gauges 21

S. W. E. EARLES: Rotation of compound thick cylinders 23

J. L. DUNCAN: The hydrostatic bulge test as a laboratory experiment 29

F. W. SCHMIDT and C. BIRNIE Jr.: A network analyser for instructional purposes 37

T. H. LAMBERT and R. M. DAVIES: Servomechanism stabilization by analogue simulation . . 43

R. T. GRIFFITHS: The smoke screen technique of flow visualization 47

C. W. KILMISTER and W. CARNEGIE: The application of Hamilton's principle to continuous mechanical systems 49

W. A. WOODS: Dynamics for engineers via Hamilton's principle 61

Letter to the Editor 79

Book Reviews 81

Number 2

PAGE

J. MICHALSKI: Belt friction apparatus for static and dynamic tests 85

M. COXON: Comments on "The experimental determination of the lift and drag of a spinning ball" 89

R. P. BRANN: Determination of the stability criterion of a flexibly-mounted rolling wheel . . 93

A. H. RICHARDS: An apparatus for demonstrating frequency response 101

G. SVED: Stresses caused by dynamic loads 107

K. E. MACHIN: A graphical solution for fatigue problems 111

G. J. BURRELL: The stagnation point paradox—an experimental investigation 115

F. BAKHTAR and B. F. SCOTT: Quizzing—an aid in the assessment of student performance . . 125

ASIM ÜLKE and HAROLD L. DOWELL JR.: The digital computer in teaching kinematics of mechanisms 137

F. R. E. CROSSLEY: Introducing the electronic analogue computer by way of kinematic geometry . 145

ARTHUR G. HANSEN: Generalized control volume analyses with application to the basic laws of mechanics and thermodynamics 161

LAWRENCE MANN JR.: A quantitative approach to class size and instructor load 169

R. E. LITTLE: Fatigue failure and cyclic stress analysis using Mohr's circle 171

G. M. W. GREGORY and D. C. CHANDLER: An experiment to demonstrate the theories of elastic failure 177

P. W. HARRISON: The size of the yard 181

W. A. C. SWIFT: The compound pendulum with finite displacement 183

Number 3

PAGE

J. L. WIGHTON: The managing function in the laboratory 189

G. R. HARVEY: The optimum design of a tensile stressing attachment for rectangular section concrete specimens 203

W. A. C. SWIFT: An approximate analysis of the motion of a rolling pendulum with finite amplitude 209

J. J. CRIPPS: Cylinders under pressure 217

R. KITCHING: The experimental determination of bending stresses in plates 227

C. A. M. GRAY and R. W. UPFOLD: A visual aid for the teaching of design 233

Letters to the Editor 237

Book Reviews 241

Number 4

PAGE

JOHN H. LAMBLE: The World Congress on Engineering Education, 1965 245
The Exhibition of Engineering Educational Resources 259

R. W. UPFOLD: Dynamic measurement of displacement using small inductance coils 269

M. L. MEYER: A simple derivation of Lamé's equations 277

G. J. BURRELL: The first law of thermodynamics. Application of energy equation in experimental analysis 283

C. J. M. LEE: Rationalization in fluid mechanics (with particular reference to open channels) . . 293

H. HIGGINS: Photoelasticity—A tool for an engineer 301

S. A. V. SWANSON: Dynamical concepts, measurements and units 309

C. D. MCKAY and A. C. LEONARD: The solution of one-dimensional steady-state heat transfer problems using a non-iterative numerical method 315

J. L. WIGHTON: A survey of academic loads associated with the engineering laboratory 323

J. L. WIGHTON: A survey of the function of Chief Technician in Engineering College Laboratories 331

M. A. PLINT: Counter revolutions: A problem in experimental accuracy 339

Letters to the Editor 297, 341

Book Reviews 343
